

Volume 36, Number 2 Fall 1992

From the Editor ...

To those of you who read this magazine and support the School – I thank you. The financial section of The Andrean will inform you of our recent successes – and there are many. To those of you who do not support the School, we urge you to take another look.

It is costly to keep in touch with you – please help cover that cost!

This issue of The Andrean brings a record sixty pages of news of the School and its alumni. Of particular interest is Bob Arril's beautifully written piece on the student trip to Nepal – it is a 'must read'.

Headmaster Bob Bedard's Prize Day speech is in itself an 'annual report' of the School year 1991-92 at St. Andrew's. In addition, his article, The Leading Edge, is fascinating and written for the reader who wants information on S.A.C.'s computer network without the technical language.

We are pleased that Fred Rowell advised us of his induction into British Columbia's Sports Hall of Fame. In an Olympic year, it is particularly fitting to report on Fred's contribution to Canada's Olympic program.

Jim Herder Editor

On the Cover ...

The cover photograph was taken in Nepal, at 19300 feet with Mt. Everest in the background, by a Sherpa guide: [l-r] Tom Luxemburger '93, Jamie Menlove '92, Alex Boothby '92, Albert Poon '92 and [front] Ian Cragg '94.

Headmaster's Report A Sense of Brotherhood

Shin Miyake '92 accepts the Colonel F.A.
Tilston Award for effort, persistency and
tenacity from Kingsley Ward, Chairman of
the Finance Committee of the Board of
Governors.

St. Andrew's College might be a quiet and calm place when compared with the turbulence of the world outside its gates, but in its own terms, it has had a busy and exciting year.

Such a stellar School year would not have been possible without tremendous behind-the-scene support. I'm thinking particularly of the countless people who give unstintingly of their time, talent and effort, and without whom St. Andrew's College simply couldn't function. To all of these dedicated individuals - Mr. Peter Harris and the Governors, Mr. Tetlock and his efficient and eclectic staff, the Development Office under the direction of Mr. Herder, who is the creator of the prestigious Andrean, the Old Boys' Association, the Ladies' Guild, with a special mention to Sandi Keto, its President, and of course, the parents and masters of the School, my heartfelt appreciation. 'Thank you' is painfully inadequate.

Traditionally, the Headmaster's report deals with the salient events of the year and pays tribute to the key players in the various activities. For the sake of brevity, I will leave it

to the School Newsletter, The Highlander, the adopted son of Mrs. Gayle McPherson, a Governor of the School, and to the School Magazine, *The Review*, Mr. Treasure's production and the envy of our so-called competitors, to deal in detail with each occurrence and to give acclaim, where due.

David Kim '92 is presented with the Craig Mitchell Memorial Prize from Board member Barry Black '56. The Award is for distinguished academic and athletic accomplishment by a student in his graduating year.

Nevertheless, I should like to mention some of these events and some of the accomplishments which we often take for granted, but which contribute to the diversity and the vibrancy of S.A.C.

During last summer, under the guidance of the "Student Life Committee" of the Board, a great deal of work was done to the Residences. Upon their return in September, the Upper School boarders realized that wholesale transformations had taken place. The overall effect has been outstanding — our carpenters tell us that they've had to direct their energies elsewhere, so little has had to be repaired during the year; more improvements are contemplated.

Over this past year, our students competed in a number of academically related contests, with

impressive results. I will mention a few, focusing first on the area of debating and public speaking, which occupies a prominent place at the School. In one such contest, our nominees, Ryan McNally, Robert Leckey and Malcolm Ross, represented St. Andrew's in an international independent school competition in Winnipeg, facing some 50 teams from the U.K., the U.S., Cyprus, Bermuda and all of Canada. St. Andrew's placed first overall. That is really quite an achievement.

For the past 2 years some 15 mathematics students have participated in senior national contests, under the auspices of the University of Windsor. St. Andrew's has placed 5th and 21st as a school in competition with the 250 other top Canadian schools represented.

In keeping with the leadership we have shown in the computer field, our representatives, Geoff White, Michael Worry, Jason Worry and Robert Burke, earned top honours in the "First Annual Programming Contest for Independent Schools", our Treble Choir again garnered first prize in the Lions' Music Festival; Deb Majumdar, Simon Williams, Matt Ward, Kam Chan and Julian Battiston were awarded 2nd place in the Junior Science Olympics.

Most of you have had occasion to view the School Video 'A Day at St. Andrew's'. As you may know, this 12 minute video, produced by Gord Henderson, an Old Boy of the School, depicts S.A.C. as it really is. This video was entered in the International Film and Television Festival of New York which rewards achievements in Communication. In competition with entries from 33 countries in the Non-Broadcast

Headmaster's Report A Sense of Brotherhood

Category, our video was awarded the Gold Medal, an outstanding accomplishment.

Once again, we were treated to some exceptional and unique theatrical performances: *Macbeth* in the fall, *Paint your Wagon* in the winter term, and 5 distinctive plays during *Focus*, our Arts Festival. This event also gave everyone the opportunity to appreciate the wealth of talent our students have in the fields of music, art and poetry.

In athletics, we experienced significant success in just about every one of our 18 competitive

Dr. and Mrs. Volker Stein presented a new award to the School this year. The parents of Alexander '90 and Christian '92 endowed the Stein Family Award presented to a graduating student who has attended S.A.C. from grade seven and has made a significant contribution to the School academically and athletically. The first winner is Scott Armstrong '92, pictured above receiving the Stein Family Award.

sports and their 51 teams. At the first team level, 2 major championships were earned — one in I.S.A.A. Basketball for the second year in a row — with a major share of the credit going to MVP Carlos del Pino, and a second in track and field, where our team totally dominated all other independent schools, for the third straight year. Furthermore, the first hockey team

represented us handsomely in the Maritimes and in the Eastern U.S., aside from receiving acclaim in Metropolitan Toronto.

Much has been written about Sir Edmund Hillary's visit to St. Andrew's — the time he spent in the classrooms, the fund-raising dinner and Sir Edmund's presentation. This encounter with such a noble man led directly to a never-to-be-forgotten experience for 5 well qualified students who spent 6 weeks in the Himalayan mountains doing their share to improve the lot of the Nepalese people. Our thanks to Bob Arril and Fraser Cowell, the trek leaders, and to Tony Myrans for spearheading this project.

A special mention goes to Mrs. Farr of the Ladies' Guild, who facilitated the Social Awareness Program, which, this year, dealt with the environment, motivation, living with AIDS, believing in oneself and with the dangers of smoking. Also to be underlined is the work of the boys who bought food, clothing and toys for disadvantaged children at Christmas, and who canvassed for the Salvation Army in May.

A good indication of the quality of the food at St. Andrew's (regardless of what you may hear occasionally), lies in the annual award given by the Grade 13's to the person on campus who, in their estimation, has made one of the most significant contributions to their everyday life. Their choice, in an unparalleled expression of gratitude, went to the Manager of our Dining Room Services, Mr. Mike Hillick.

To end this comprehensive review on a sad note, we must say goodbye to a special couple who

Mrs. D. Bruce Macdonald, widow of the late Dr. Macdonald, presents the Macdonald Medal to Ian Michael. The medal is donated by the Old Boys' Association to the graduating student most distinguished in studies and athletics.

joined us for this one short year on an exchange from Marlborough College in England. To Andrew and Amanda Brown, our sincere thanks for your many contributions and for your friendship. We will remember you fondly; may you take with you similar sentiments towards St. Andrew's College.

And now to the graduates ...

At one time or another, every one of us has gazed from the window of a bus or a train at landscape sweeping by. The sense of passage suggests the movement of our lives, as does the changing landscape, and provides a mental distance

Gayle McPherson, a member of the Board of Governors, presents the Brooks Cup to Ryan McNally for the best debater in Lower and Upper VI.

Headmaster's Report A Sense of Brotherhood

from the immediate concerns. You sort out past decisions and events and see them in a fuller perspective.

Similarly, as your last day as a schoolboy moves swiftly by, these moments on this Quad with the soaring chapel in the distance may provide a vantage point for reflection on the meaning of your St. Andrew's education and your encounter with it. What has it given you of knowledge, insight and breath of vision?

You have gained in knowledge, surely. Yet, important as it is, knowledge alone is not what you sought here.

Most of you, I hope, have seen that beyond the study of science or math or art, is the discipline and enlightenment of the mind - this is to say the development of insight and comprehension, of respect for fact and critical enquiry, and an allegiance to honest judgement. If something of that spirit of learning has become yours, it will not leave you.

I hope also that you will take with you from here a sense of brotherhood—a deep respect and tolerance for your fellow men and women, no matter what their race, religion, colour or lifestyle. In the movie, Frankenstein, there's a touching scene in which the escaped monster comes upon the cottage of a blind hermit. The hermit, thinking his visitor merely inarticulate, calls him friend, which the monster respects and comprehends. Their encounter is disrupted by the pursuing villagers, but until they arrive, the hermit exhibits the essence of friendship. The hermit sees only the man within the monster, holding no other judgements. The reason that Shakespeare had Mark Antony

Head Prefect Rory Manning '92

address his audience as "friends" before "Romans" and "countrymen" is that he knew how the heart leaps up at the smallest sign of brother-hood. Feeling more alone and isolated than ever in our fragmented country and world, we must also leap at those signs of friendship and brotherhood.

I hope you will carry with you a recognition of the complexity of human life and the world's problems. Your generation, in a measure far exceeding mine, has an awareness of, and indeed a passionate concern for, some of the pressing problems of the here and now — such as the environment, national unity, the AIDS epidemic, persistent problems of racism and poverty.

What can you do to help in some way, however small, to move men and nations toward better rather than worse modes of existence?

You can, I suggest, begin by eliminating cynicism, even though realizing that our flawed world has always been in trouble, and probably will be so for ages hence. There has always been widespread uncertainty and indifference, deep-set violence and frequent conflicts in points of view. Many times over, it has been discovered that cynicism offers neither solution nor an end to the tough, vexing problems the human race faces.

In our times, the betterment of the human lot requires, more than ever before, the combining of humanitarian empathy with optimism and toughmindedness, sophisticated knowledge and a long view.

You who are about to graduate will find, I hope, that your years here have given you at least some of these insights, and that these will increase as you add new understanding and new wisdom to what you have acquired here.

So go forth, appreciating those who have made it possible for you to attend St. Andrew's, while recognizing today's problems and facing them with empathy, optimism, and a feeling of brotherhood.

R. Bedard.

A fitting end to the Graduation Day is dinner in the Great Hall. The Class of 1992 awarded their Biafran Award to Mike Hillick, Food Services Director for the College.

Mike surprised the group with a cake modelled after the chapel.

Acute Mountain Sickness (AMS) develops in susceptible persons at altitudes over 8000 feet. Its physiological mechanics are not perfectly understood; it is not possible, for example, to predict who will fall prey to it. More mysterious, however, is its antecedent: Acute Mountain Fever - a contagion which ran rampant through the St. Andrew's College Community in November of 1991 when Sir Edmund Hillary came to visit. It is with that event that the adventure of seven Andreans at the top of the world really began.

Sir Edmund Hillary has been an international figure in humanitarian aid and environmental concern since his ascent of Everest in 1953. There was considerable excitement on November 22nd when he arrived with Lady Hillary, Zeke O'Connor, President of the Canadian Hillary Foundation, and Ang Rita Sherpa, Director of Operations in Kathmandu. The agenda for the day was simple: Hillary would

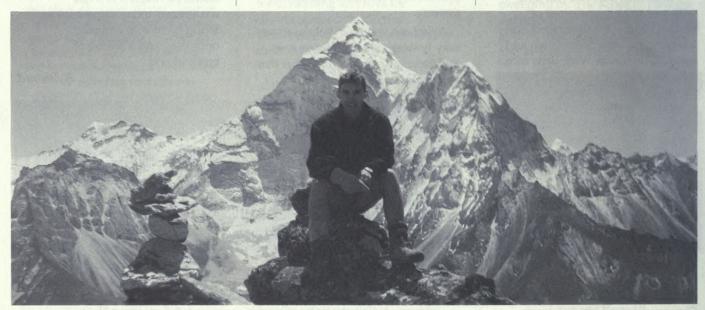

make a presentation in Ketchum Auditorium, share in selected classes and speak at the fundraising dinner in the evening. O'Connor and Ang Rita would provide short ancillary presentations to explain the work of the Foundation and the role which S.A.C. might play. Apart from the T.V. cameras at the morning session, the whole thing was low-key; Hillary was an utterly unpretentious and thoroughly engaging speaker whose descriptions of ascending Everest or falling into a crevasse were equally riveting. O'Connor and Ang Rita put the stamp of immediacy on the current work of the Foundation by describing the building of schools and medical clinics, and outlining the challenge of the reforestation program.

The impact of the Hillary team was decisive; when the selection interviews took place three months later, more than twenty candidates were clearly still under the spell. Those with low

Tom Luxemburger (left) a parent of two boys at the School chats with Sir Edmund

immunity to snow capped peaks, the aura of history, and the allure of exotic culture, were anxious to be off at once to higher altitudes. Asked if they would prefer work high on the glacier at Everest Base Camp or among the people of a Sherpa village, most replied that either or both would be great. Sir Edmund's love of high places and

Ian Cragg '94 on top of the world

his vision of what could be done for the Sherpas had been transmitted.

At length, and after much agony, the search committee selected five boys for the journey: Alex Boothby, Ian Cragg, Thomas Luxemburger, Jamie Menlove and Albert Poon. Two staff members. Fraser Cowell and I, met with the boys frequently during subsequent weeks to sort through the tangle of preparation issues including passports, selection of appropriate gear, medical examinations and inoculations. The latter required us, among various indignities, to 'turn the other cheek' to a hawkish nurse with a large needle. Some suffered internal disorders as a result; all of us sat with discomfort for a day.

Early on March 12th the team assembled at the Thai Air ticket counter as a huddle of concerned parents looked on. There were, of course, immediate problems. Several gargantuan bags stuffed with gifts of clothing and school

supplies for the Sherpas exceeded weight restrictions and had to be repacked. A flustered check-in clerk made the painful admission that she had inadvertently dispatched some of the bags to Bangkok instead of Kathmandu; the mistake would have to be rectified in Bangkok - "Sorry and good luck ..."

After the weeks of frenzied activity, the flights to Tokyo and Bangkok were serene. In the dim light of dawn the following day, as the boys slept the sleep of the young and the flexible, I looked down upon ice floes - probably close to the Aleutian Islands - and reflected that we were going to be a long way from home.

Arriving at Kathmandu airport on Saturday, March 14 after 24 hours in the air, we were met by Zeke O'Connor, President of the Canadian Hillary Foundation. His giant stature dramatically enhanced by the diminutive Nepalis thronging the reception area, Zeke moved swiftly to

Foreground: Female Sherpa porters resting beside their loads before continuing on the trail from Thyangboche. Background: (Upper Right) the cookshack where we took our meals.

Trekkers Lodge Sign with one of the many variant spellings of Thyangboche. Some cold nights when the wind blew, the Lodge looked inviting. We were in tents.

arrange for transport to Hotel Gauri Shankar, our base of operations in Kathmandu. We were shortly afforded the first glimpses of a culture far removed from our own. For me it was multiple issues of National Geographic come to life: a pageant of beggars and palaces, soldiers and sacred cows, dusty roads congested with decrepit vehicles and cycle taxis, and, everywhere, throngs of people, their costumes embracing all levels of human affliction and privilege. Beetling through traffic in a VW van was hair-raising: navigation seemed to be governed by the crudest form of social Darwinism. The only serious law concerned cows: hit one and you're out - for a long time in a devout Hindu society.

Hotel Gauri Shankar proved to be a somewhat rustic but comfortable oasis on the edge of Tamil - the tourist section of the city. The boys were ecstatic; they snapped pictures like men possessed, and delighted in finding themselves at the centre of large groups of children all reaching for S.A.C. pens or other baubles. They quickly discovered

that one does not buy without haggling and the resulting competition among them for such goods as Gurhka knives was, in their own parlance, "brutal".

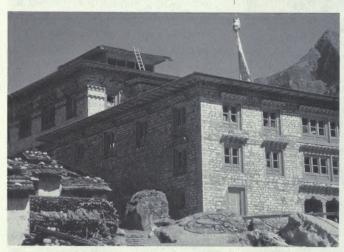

On a field in front of the monastery at Thyangboche. (l-r) Albert Poon, Ian Cragg, Peter Carnegie (New Zealand), Alex Boothby, Tom Luxemburger

If phase one was an overwhelming of the sensory apparatus, phase two was a rude battering of the psychological. For three consecutive days we rose early, snatched breakfast, and rushed to the airport, tensed for the 40 minute flight to Lukla, the tiny airstrip at 9000 feet which would be the starting point of a challenging three-day, 4500 foot

trek to the project site - the Thyangboche Monastery. Each time the mountain winds made landings impossible for the Twin Otter; flights were turned back or cancelled before take-off. The cheery voice on the airport P.A. would intone the dreaded words: "The Royal Nepal Airlines is pleased to announce that all flights to Lukla have been cancelled." In retrospect, it was a good introduction to the provisional nature of all plans in Nepal, though at the time, it seemed a merciless rebuff from the gods. Since our objective was to reach Thyangboche by March 22nd in order to rejoin Hillary, it was resolved that we should arrange to foil Mother Nature with more aggressive tactics. On the 19th we lifted off gently in a seventeen-passenger Super Puma Jet helicopter belonging to the Royal Nepalese Army, and rocketed toward the heights.

Within two hours we were on the trail, our gear proceeding ahead of us on the backs of our Sherpa Trek Team members. After several hours we began to

discover a fundamental reality of trekking in the Himalayas: going up often involves going down. The constant undulations and serpentine looping of the ancient foot paths mean that a hard climb of four or five hundred feet might immediately be followed by an even greater descent, so that the net gain over an hour might actually be only a few feet. Distances in the mountains, therefore, are assessed in terms of approximate walking times. To be more exact, there are two sets of times: those for tiny Sherpas, often barefoot, carrying loads of eighty to a hundred and fifty pounds, and those for large, panting foreigners lumbering along in their high-tech hiking boots, their only encumbrance a camera. The fact that the times for most foreigners are at least three times slower is also attributable to the threat imposed by Acute Mountain Sickness - the altitude problem. We were acutely conscious of the acclimatization factor as we arrived, breathing hard and slightly footsore, in Phakding, our first night camp.

View of the Thyangboche Monastery, reconstructed after the 1989 fire.

Resting on the trail en route to Kala Pattar

By morning, we had trouble. Up to this point, the intestinal turbulence which some of the boys had experienced, was relatively mild and short-lived. Now Fraser Cowell was exhibiting similar symptoms with greater severity. After an hour on the trail, it was clear that he would need some recovery time in the village of Benkar. It was agreed that Passang Tshering, our Sherpa second-in-command, and I would remain with him while the group pressed on with our Sardar or Head Sherpa. As his condition did not improve significantly, descent to Lukla was required. With considerable disappointment all round, Fraser returned to Kathmandu by horse and helicopter.

When I rejoined the boys in Thyangboche they were very fit, in good spirits, and clearly enjoying themselves. They regaled me with stories of the meeting with Hillary at the Monastery, their daily work, ascent of neighbouring peaks, and

encounters with other expeditions passing through Thyangboche on the way to Everest.

Work at the Thyangboche Monastery was the ultimate lesson in humility. At 13500 feet, the hope of a sparkling performance is about as thin as the air; particularly when the job involves hacking trenches out of frozen ground, removing huge stumps, disinterring boulders, and redistributing tons of rubble. Our original mandate was to paint the magnificent reconstruction of the Monastery and school which had burned in 1989. However, when neither paint nor explanation were offered, the team seized the opportunity to gasp, puff, and pant its way into landscaping history. The boys were tremendously inventive at turning the drudgery of moving matter from A to B into all sorts of games. There was a good sense of camaraderie which included Pete and Mike, two students from New Zealand, and Peter, a young Swiss tradesman. The over-forty crowd

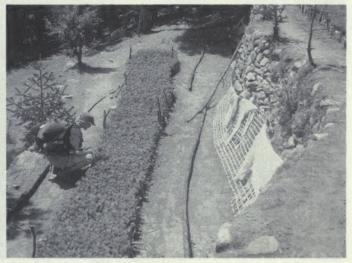

On the grounds of the Monastery digging for rocks that could be used to construct stairs.

was fairly often found catching its breath on the sidelines, summoning its reserves for the activation of a shutter release.

Despite the limitations of our physical abilities at altitude, we secured the praise and thanks of the highest authority in the land. The Rinpoche of Thyangboche, the reincarnate Lama, is an immensely powerful figure among the mountain people whose daily lives are shaped by the beliefs and

One of many hanging bridges adorned with Buddhist prayer flags. Tom Luxemburger is busy photographing an advancing Sherpa.

Ian Cragg examines seedlings at one of the tree nurseries developed and funded by the Sir Edmund Hillary Foundation.

observances of Nyingmapa Buddhism. Twice we were summoned to an audience with this rather austere man who, through a translator, responded to our many questions with a measured blend of informed intelligence and allusions to the arcane wisdom of the higher spiritual orders. It was clear that our efforts were appreciated and viewed by the Rinpoche as part of the ongoing interaction with Westerners that had enabled the Sherpa people to develop an educational system and greatly improved health care. Upon our departure from Thyangboche we received cottas - ceremonial silk scarves - from the Rinpoche. It was a final salute and the official imprimatur on our contribution to the reconstruction project.

After sixteen days at Thyangboche, the boys were ready for the high point of the trip - a four day trek to Kala Pattar, a 19000 foot peak adjacent to Everest. On April 6th we hiked through a blizzard to reach
Periche at 14000 feet. There, at the
Medical Clinic funded by the
Himalayan Rescue Association
and staffed by two volunteer
American doctors, we attended a
lecture on Acute Mountain
Sickness. When I returned to the
clinic several hours later with
headache, chills and a general
feeling of malaise, the doctors
suggested that I try an hour in the
"Gamov Bag" - just in case my

symptoms were due to AMS. The bag, developed by a Russian-American physicist, is little more than a plastic sac which can be inflated using a simple foot pump. The internal pressure of the bag is then roughly equivalent to that at an altitude of 9000 feet. This device has saved many lives since AMS is due exclusively to the pressure difference at altitude and even a brief 'descent' can be sufficient to allay rapidly escalating symptoms and to permit an effective acclimation or adaptation to occur. In my case, an hour in the bag was comfortable but ineffective; it was quiet, warm, and there was no phone. During the night at the lodge however, it became clear that whatever bug I had, had not been bagged. Chagrined and chanting the benign oaths clergy are allowed, I spent part of the following day at the clinic while the boys embarked on some spectacular day hikes in the area. Next morning, the Sardar agreed to carry on with them to Lobuche, the camp from which the assault would be made on Kala Pattar. A day later, I had recovered and was able to catch up, and to

Are we digging a hole in the ground or are we helping Sir Edmund Hillary reconstruct a monastery? On site at Thyangboche.

make my own ascent of Kala Pattar the following morning.

Looking down on Everest Base Camp and the Khumbu icefall, standing so close to the highest peak on earth - it was an experience which left everyone groping for words. The impact was acute and multi-levelled: the physical challenge of the climb, the stark, desolate, forbidding beauty, and the sense of the historic triumphs and tragedies played out on these barren heights. If there is any indelible element in such experience, it has as much to do with awe at the scope and possibility for human achievement as it does with a sense of the numinous in the face of natural phenomena.

On April 16th, Good Friday, we bounced down Lukla's rocky runway in the Twin Otter, and lifted off into clouds of heavy smoke from huge forest fires burning on the mountain sides. The fires had been deliberately set by hunters seeking to flush out game. The polluted air and the acres of charred land below were cogent reminders of the urgency of the prongs of Hillary's initiative: education and reforestation. We had visited schools and tree nurseries built by Hillary. We had made a tiny contribution to the effort to ameliorate conditions in a third world country by empowering people to help themselves. The fact that we had gained more than we had given was not troublesome. Acute Mountain Fever does not abate easily and so much remains to be done.

Track & Field Reaching New Heights

The St. Andrew's College Track & Field 1992 team won a third consecutive I.S.A.A. championship. St. Andrew's has been victorious five out of the past eight years in I.S.A.A. track & field competitions. The enthusiasm for track & field at S.A.C. has grown. This year coaches David Galajda and Bob Perrier had over sixty full-time members on the senior and junior track teams. The boys have many events to choose from, ranging from sprints, hurdles, pole vault, javelin, etc. The success of the program is due in part to the development of an indoor track team that operates during the winter term. This year eighteen individuals competed in six indoor meets held at York University. The indoor season allows team members, especially those in the technical events such as the pole vault and hurdles, the opportunity to use the excellent facilities and national coaching available at York. This year's victory at the I.S.A.A. championships showed the determined and enthusiastic effort of the team as they captured the midget, junior, senior and overall team championships. Congratulations to all track & field team members, past and present, and here's hoping that you do indeed reach new heights in future competitions!

D. Galajda.

The 1992 Track Team celebrates a third consecutive I.S.A.A. title.

Questions that revolve around the introduction, use and growth of computing systems in an educational setting are questions that we, as educators, simply cannot avoid. Regardless of what each of us concludes, we invariably find ourselves seeking out information that we can use in plotting our School's computing direction. The four questions most frequently asked are:

What is the size and shape of the computing system at St. Andrew's?

How did this system come into being?

Who is currently using the system and what are they doing with it?

What is the future of computing at St. Andrew's College? In answering these questions I hope to impart, beyond just the facts, a sense of my enthusiasm for what we are doing as well as my understanding of how computers fit into a school with traditional educational goals and values like St. Andrew's College.

What is the size and shape of the computing system at St. Andrew's? The network system is

made up of five network file servers. File servers are the computers at the centre of all activity in the system. All but one of these servers is interconnected by a variety of media ranging from state-of-the-art fibre optic cable to phone-type cabling. Each media is in place for a specific reason and the mixture provides very fast network access from the furthest points of the campus. Three of the servers are devoted specifically to academic computing and serve the following areas: the computer studies lab, the language lab, the library, the various department offices, the masters' common room, the boarding residences, and the residences of the 15 masters who live on-campus including each of the housemasters. All three servers cooperate seemlessly to the point where many students and masters are not aware which individual server contains their data or which contains the program they are working with. This capability greatly improves the usability of the system for those who are not dyed-in-the-wool computerites.

Of particular interest is the

Access to terminals in the library will be expanded during 1992-93.

library file server which stores the index to the school's collection of books and which supports access to a large amount of reference material stored on CD-ROM. In making this reference material available to all network users as opposed to just users of specially equipped stations, our staff has really pushed the limit of current technology — a fact which goes happily unacknowledged by our grade 8 students researching third world issues in geography class.

Another server in the triumvirate — the language lab server — is the home of the St. Andrew's College ENIGMA electronic bulletin board. The bulletin board is a favourite because it allows students to chat with each other, share ideas about stories, jokes, and projects, and also to retrieve information from repositories of "shareware" programs. In addition to the bulletin board, we plan to provide access to the network system itself to all day boys by way of modem. Technology itself is holding us back on this one because cost-effective and well-integrated software is just not available in the market to serve this need.

This year we broke ground in the educational computing arena by offering network access to every boarding student in the Upper School. We supply the connection — which looks like a regular phone jack — and the student supplies the workstation. We are capable of supporting network access for up to 230 boarding students. The 65 students who have taken advantage of this access to date are using the network to type their essays, research their projects, and

communicate with their peers. In 1992-1993 we expect to have another 150 students online from the residences. We have 60 workstations provided by the School for direct use in the curriculum. These machines are all Zenith Data Systems IBM-compatible computers. The three academic servers also connect the health centre, the cadet store and the yearbook office.

One of the servers in the network is designated for administrative use. The total number of people making daily use of the programs and data on this server is 15. This administration server is connected to the three academic servers so that masters may access the student records database and report term results for each student online. Thus, four servers — three academic and one administrative — form a large multi-server network or local area internetwork.

The Alumni and Development Office maintains a database of over 6,000 records and uses a standalone server and local area network. News of alumni is entered daily in an individual's record to be used for a variety of purposes throughout the year. Specialized mailings to groups of a few, or of several thousand, are undertaken on a regular basis.

Revenue accounting is a very important component of the development system. Donations from Old Boys and friends of the School are designated to various funds or endowments, within the guidelines established by Revenue Canada.

Historical records are maintained in WordPerfect files

Bob Perrier (left) Housemaster of Memorial House and Geoff Smith "call up" the administrative network.

and are frequently updated. Use of the Development Office computer network is advanced, and has saved expenditures in printing and design costs for many members of the S.A.C. community.

How did the school network come into being? There are two key factors in the story of how the network has come to be what it is today: a highly motivated staff and corporate partnerships. In 1989 Aubrey Foy, now the Head of Admissions, and Steve Rush, the Computer Studies Coordinator, began talking about networking the existing computer studies lab. When

they understood the benefits of networking this one lab in terms of sharing printers, sharing hard drives and sharing programs like WordPerfect and Quattro Pro, they started to expand the concept. It wasn't long before, in concept at least, the whole campus was connected by way of one large network.

Of course, Aubrey and Steve needed to convince us of their vision of a school completely linked by large data highways. The capital outlay was significant, but we were looking for ways to enhance an already strong program of study and for ways to distinguish St. Andrew's.

We did have some concern over whether this influx of high technology into a traditional educational setting would affect the personal character of the School. What about tradition and humanist values? Yet, the medieval universities of Europe, from which we inherit the humanist tradition, flourished largely due to the availability of the classics after the invention and widespread use of the Guttenberg printing press. Information and knowledge became a secular pursuit and the Church was no longer the single source of knowledge about the world. For some at the time, this was heresy and marked the beginning of the end of an ordered society. There is no doubt that technology, like the computer and the printing press before it, which

The hub of the network is busy up to eighteen hours a day.

changes the very way in which we communicate and which forces us to re-think old problems and to discover new ones, takes time to be fully integrated into society. In light of this and much other soul searching, I am convinced that introducing computers at St.

Andrew's on such a large scale was and is the right thing to do.

Putting the philosophical and historical adjustments aside, there is the plain fact that we are charged with preparing students for the world beyond our gates. We cannot graduate students, regardless of whether they are arts or science oriented, without the basic skill of preparing an essay using a wordprocessor. Knowledge of computer software programs like WordPerfect, dBASE, and Quattro Pro has enabled many of our students to get summer jobs working where a lack of these skills would have shut the door. Scientists, mathematicians, filmmakers, business people, construction contractors, teachers, lawyers, artists, doctors and engineers all use computer technology daily. If we do not want our graduates to become vulnerable to a technocratic elite, then we must educate them to become intelligent users and shapers of this technology.

Of course, at this point there was still the question of money. Could we afford to computerize the School? As a result of negotiation undertaken with Zenith Data Systems/Group Bull we entered into a partnership with the single goal of providing world-class computer support for our curriculum. Zenith provided their technical expertise in the areas of educational computing and

network design, as well as \$70,000 worth of equipment. Partnerships with CanShare, who installed the cabling system, and with BusinessLand, who installed the Novell NetWare operating system, were an essential ingredient in the mix of skills and technology.

With both desire and business support at hand, our very forward-thinking bursar, Howard Tetlock, and I, along with the rest of the Board of Governors, approved a plan to proceed with the installation of the system that I have already described. Within 2 years we had reached the level that we had initially thought might take up to 3 or 4 years.

Today, Steve Rush oversees the maintenance of the academic servers, whereas Geoff Smith, one of our Assistant Heads, coordinates the overall effort. Of course, there are many players — not the least of which being the students themselves. Students, if empowered with responsibility and given a challenge, will rise to the occasion. In keeping with this, we have a dedicated team of network managers who trouble-shoot and report problems throughout the system. Many students now see it as their responsibility to ensure that our system is the best that it can be.

Who is currently using the system and what are they doing with it? There is no doubt that the single most used capability is for students to create, edit, and print in one of over 30 fonts and styles. English and history essays, science reports, physics experiments, letters to summertime employers, letters to university admissions officers, page proofs for our yearbook, *The Review*, and presentations to be given for environmental studies

The St. Andrew's educational experience is dramatically enhanced with the addition of the network.

and chemistry among other classes. A document may contain a chart of the fluctuations in deer population generated by a spreadsheet program, or a graphic of the setup for a chemistry experiment that a student has created with DrawPerfect, or an image of a Zenith laptop computer scanned in from a photograph using our highquality image scanner to illustrate a computer studies report. Many masters have commented on how certain students take a hitherto unnoticed pride in their work. And the beauty of the work is not all skin deep. Masters have also commented on improved writing and organization which they feel results from the ease with which students can edit and add to documents using computer-based media.

Many of our more experienced masters have undertaken the task of computerizing 10, 15, and 20 years worth of course material. They are not just typing this material into the wordprocessor, but are revising it for a new medium. Masters can make class notes available to students on the network and effectively deal with

students who are away sick or absent because of a sporting event. When course material is computerized, masters can more easily adapt the material for students with special needs. I would venture to say that over 50% of our curriculum has been revised to include the computer. This is exciting for me, for the masters, and, most importantly, for the students.

The computer science department has made excellent use of our communications capability in keeping up with the most current information available from CompuServe to ensure that our network is tuned properly to handle the amount of traffic it carries. Our debating coach, Rupert Ray, has tied into a database that allows him and his debating team to research issues so as to more thoroughly prepare for upcoming competitions.

These are a few examples of the current uses of our computer network.

What is the future of computing at St. Andrew's College? Our plans for the future are taking shape on two fronts: increased computer-based communication with sources outside the School and increased integration of computer-based information sources across our curriculum.

We want to provide our students and faculty with the capability of accessing the many and widespread sources of information that exist outside of our school. The ability to access current financial data on Canadian mining operations in northern Alberta, for example, would help stimulate discussion in an economics class. If students in our OAC writer's craft

course could conference with writers in residence at various universities, this might hone their writing skills and provide them an experience we cannot offer at home. Many Canadian art galleries and museums provide an online service that people can access to retrieve information about their collections. Students looking for educational and travel experiences abroad can search databases for opportunities. Environment Canada offers satellite weather and geographic information that could be used to enhance a student's sense of the natural world. These activities improve programmes already in place like Expansion Week in which students gain experience through travel and by visiting businesses and universities and our Focus on Arts week in which students present their work along side that of professionals.

As for increased integration across the curriculum, we would like to see the computer used more and more as a presentation tool in the classroom. The computer studies department is preparing a proposal with the help of Zenith Data Systems to upgrade the main computer lab to more state-of-theart machines easily capable of running a graphical user interface system like Microsoft Windows. A system like this will allow students to more easily take advantage of multi-media technology which combines graphics, sound, text and even video to produce presentations for their classes. This type of system also makes it easier for non-computer experts to access and use the system which will eventually smooth the integration of similar setups into other classrooms. This proposal also calls for updates to the classroom

adjoining the computer studies lab that would see the installation of a device which sits on top on a standard overhead projector and allows the computer screen to be projected on a whiteboard. This capability will allow students to show their multi-media presentations using the same medium on which they were created — the computer. The geography department is investigating new software technology which allows the user to walk or fly around just about any geographical formation of interest in the world. These threedimensional models exist and are really the logical extension of existing programs that display two dimensional maps of the world like PC-Globe and World Atlas which are themselves logical extensions of printed atlases.

The amount of information that can be stored on a CD-ROM is really staggering. The unabridged Oxford Dictionary of the English Language as well as Shakespeare's complete works fit very nicely on a single disk. The librarian is actively seeking out ways of realizing the electronic library using this technology.

These are our plans for the future with respect to computing at St. Andrew's College. I would like to thank the many members of our School family who have financially supported the establishment of the S.A.C. network. Through your gifts to the Old Boys, Parents, and Past Parents annual giving programs, we will continue to keep St. Andrew's at the leading edge of this fascinating field.

R. Bedard

Mexico Unforgettable

One of the absolute delights of my role as Director of Development at St. Andrew's is meeting Andreans living outside Canada.

Visiting Mexico City in March for the first time was an experience which the Bedards and Herders will not soon forget. The generous hospitality of our hosts and the many people we met was absolutely wonderful!

Strengthening our historic ties to the Mexican community by promoting enrolment of Mexican students was the main reason for our trip and it was an overwhelming success.

Our visit was coordinated by Jamie de la Macorra '50 who organized the local committee of Ramon Corona '56, Julio Dominguez '82 and his brother Gerardo '89, Pedro Martin '47, Pablo Suinaga '82, Federico Tamm '51 and Federico Tamm Jr. '79.

Thanks are expressed to Ramon Corona '56, who helped on the organizing committee.

Jim and Gail Herder, Anne and Bob Bedard in Mexico during March.

The highlight of our four day visit was a reception held at the Industrials Club to meet alumni and friends. Over one hundred and twenty people turned out to view the two award winning St. Andrew's videos, A Day at St. Andrew's (1991) and Quit Ye Like Men, Be Strong (1988), and to reminisce about shared experiences in Aurora.

The Headmaster spent a hectic two days interviewing candidates for St. Andrew's while Anne, Gail and I were entertained by Old Boys of all ages. Sightseeing included the Teotihuacan Ruins, the homes and studios of Frida Kahlo and Diego Rivera, Anthropology Museum, Constitution Plaza and dining at the exquisite San Angel Inn, to mention a few.

We enjoyed our visit immensely and left with a sense of regret. As

a result of our trip, the S.A.C. Association in Mexico will be stronger than ever. Future reunions and new applicants will further enhance St. Andrew's ties with this ancient city.

W.J. Herder

Federico Tamm '51 was one of the members of the organizing committee which did such a great job in Mexico.

Mexico Unforgettable

Jose de la Macorra '38 (left) and younger brother Jaime '50 at the Andrean reception in Mexico. Jaime was the chief organizer for the visit.

Jim Herder (left) and Armando Galindo reminisce about life in Mac House in 1959. Armando is currently on the Mexican team negotiating the North American free trade agreement.

Gerardo Dominguez '89, Luis Miguel '84, Pablo Suinaga '82. The Headmaster, Marco Fanghanel '86, Julio Dominguez '82 and Alejandro Chacon '86, chat at the Mexico City reception.

R.S.V.P. 727-4002

The Endowment Fund Stability for the Future

Mr. Graham Campbell left a great portion of his estate to St. Andrew's College in the 1950's. His bequest was invested by the Board of Governors and became the foundation of the Endowment Fund. The Campbell Houses for faculty, located near Macdonald House, were also given by Mr. Campbell.

The S.A.C. Foundation was incorporated in 1962, and the Campbell Fund came under the supervision of the Trustees of the S.A.C. Foundation.

To this base were added other bequests from Old Boys and friends of St. Andrew's and the proceeds of life insurance policies owned by St. Andrew's, as well as direct donations received in memory of Andreans such as Dick Gibb and Jim Hamilton.

Income from the Endowment, as determined by our auditors and directed by the Trustees, is used for scholarships and bursaries to enable deserving students to attend St. Andrew's College.

The Endowment Fund also invests named awards for Prize Day. Instead of contributing a prize on an annual basis, a donor can give capital and the award is endowed forever.

The Trustees of the S.A.C. Foundation are responsible for the investment management of the Endowment account. Trustees meet on a regular basis with Jarislowsky, Fraser and Co., a highly regarded investment management firm which has managed our assets for the past ten years.

During the past year additions to the Endowment through direct donations by individuals and families totalled \$117,400. The Development Office has begun preliminary work on a planned giving program which will be reported on from time to time in The Andrean. We are very pleased to report that 1991-92 saw the creation of fourteen new Endowment accounts within the S.A.C. Foundation. Contributions to these accounts shall continue to be made until the capital and earnings total produces enough income for the donors to establish their own named program. The Andrean salutes these members of the St. Andrew's community.

Douglas Wood '18 contributes annually to the Wood Bursary which is an endowed fund and partially supports a student at St. Andrew's. Doug and his grandson, Derek Archibald '86, visited for the Headmaster's Parade in May.

Sandi Keto, 1991-92 President of The Ladies' Guild presents Jim Herder with a cheque for \$14,000 to create The Ladies' Guild Endowment Fund which will assist future Andreans to attend the School.

"The difference between mediocrity and excellence ... is the size of the endowment."

Tradition.
Governors and faculty preside at Prize Day in chairs carved with the names of their predecessors J.K. Macdonald and Robertson Laidlaw. Endowment is at the very heart of stability for the future.

In reviewing the donations for the year ended June 30, 1992, we are deeply appreciative of the support given the School through the Old Boys' Annual Giving program. With economic bad news assaulting us daily, we are pleased to report good news at S.A.C. of continued growth and advancement!

Old Boys donated \$171,800, an increase of nearly \$20,000 from the previous year. Many Old Boys continue to enhance the Dick Gibb Scholarship Fund, the James H. Hamilton Scholarship and the T.B.D. Tudball Fund. Reports on these and other funds are available to donors by calling the Development Office.

The scholarship and bursary program was very well supported but is in greater need than ever as we look to uncertainties in the near term.

We were able to designate \$60,000 to the School computer network for assistance in continuing to link the campus by fibre optic cable. Only Macdonald House remains to be wired to the system.

The residence improvement program continues with a neverending list of needs. Next on the agenda is replacement of original equipment with steel doors for safety and security. The windows in all of the original buildings are badly in need of replacement as well.

I would like to sincerely thank Conrad Bona '87 and David Foster '89 who spent hundred of hours phoning donors to provide a gentle reminder. Thanks also to our very efficient and friendly staff members, Sandra Scott and Edna Collins, whose day-today effort on behalf of the alumni is outstanding.

Finally, a sincere thank you to all Old Boy contributors during the past year.

W. James Herder '64 Director of Development.

Dear Jim,

It is sixty-five years since I graduated from St. Andrew's College and in all that time I have never ceased to feel the great debt I owe the school and all those who put me on a favourable course.

Yesterday was a 'benchmark' in my life and I was greatly impressed with the warm reception you, Headmaster Bedard and Doug Worling afforded me and my oldest son, Peter. We both wish to thank you all most sincerely. We regard your gifts of school ties as being something of 'A glory of the second mile'.

I was very impressed with the vast difference in the size of the school and the quality of people I saw and met during my visit.

I am sorry to have been out of touch for many years but I assure you St. Andrew's has been very much in my mind, almost daily.

I hope all of you on the firing line will continue your very good work. Best wishes. Thank you again.

Dear Jim,

Just received The Andrean and as usual enjoyed keeping up on the various happenings at the School and the Old Boys. I was saddened to read of Ron MacKinnon's passing. How well I remember his portrayal of Abby Brewster in 'Arsenic and Old Lace'. I was the body in the play! I must have been one of the "lightest" boys at the time! As I recall he played a pretty mean bagpipe too.

I noticed the picture from 1905 in the front and, after careful scanning and comparison with some old snaps I have seen, I believe the person so marked by the arrow is my father - Donald R. McLaughlin - who would have been twelve at the time and told me of his days at S.A.C. in Toronto. I'm sure if he were around he could identify several in the picture.

I will check through various boxes and see if I can find any old team pictures for your collection.

Keep up the good work at S.A.C. and anyone visiting Ithaca is always welcome to stop in.

Sincerely,

Don McLaughlin '49

Dear Jim,

Enclosed you will find my donation to Old Boys' Annual Giving. I would appreciate it if you would credit the T.B.D. Tudball fund. All our teachers had a strong impact on us when we were students, but "Tuddy" stands out in my mind, probably because he was my housemaster at a critical stage. Yes, I was one of his "impudent boys" in Flavelle House and undoubtedly was recorded in his "doomsday" book on several occasions.

After leaving the School and entering university, I made occasional trips back to Aurora and developed the habit of stopping in to see Tuddy and his wife in their retirement cottage in town. Tuddy seemed pleased and very interested in what had become of his boys, how they were doing, and always had a cup of tea ready for visitors. Those were delightful visits and Mrs. Tudball as usual the perfect hostess.

On one occasion I mentioned that I had joined the 48th Highlanders of Canada (there was no saying "no" to John Lowndes). A smile spread over Tuddy's face at this news and he asked his wife to bring a particular box, which he opened with great care. Inside were two hair sporrans, one for the Black Watch and the other for the 48th. The latter was a beautiful goat's hair sporran, soft, not like the coarse horsehair which were common in those days. The brass had obviously been polished to perfection many times and had that hand-rubbed feature. This was the first time I was aware of Tuddy's connection with the 48th. According to the Regimental history, Tuddy went overseas with "A" company, 92nd Battalion, under Major A.C. Snively, with Lt. Col. G.T. Chisholm as Commanding Officer. His Black Watch skean dhu complete with St. Andrew and Cross was also in the box.

He removed the sporran and skean dhu and asked me if I would wear them for him. You will appreciate that for a junior officer required to assemble his full dress kit at his own expense, gifts such as these were most gratefully accepted. During my time with the Regiment I wore both with pride knowing the tradition behind them and hope I lived up to Tuddy's expectations.

Age, hardening of the leather, etc., has necessitated retirement of the sporran from active duty. I am pleased to return both the sporran and the skean dhu to the School Archives as a reminder of a fine gentleman valiant soldier, and friend to all Andreans who passed his way.

Sincerely yours, John C. Taylor '52. D.I. Campbell

Dear Jim,

I finally got back home to Switzerland a week ago and found your letter and photograph. Thank you for your kind words and for all the attention you and the Headmaster Mr. Robert Bedard gave to Barbara, Patrick and me. After seeing the School Patrick confessed to me that he would have loved to have come to S.A.C. — well, the offer was always open from my side but he felt differently. I'm sure he will send his sons. As it turns out in life, one always does the contrary to what the parents want; that's why I believe that my grandchildren will be Andreans!

I'm sure you have heard this a lot, but for me it was a very, very special thing to be back in the School after 31 years. I will savour this impression for a long time and now, of course, a part of me is back on the walls that I loved so much. Patrick said what a nice guy the Headmaster is and I second the motion!

Best regards, Klaus Wieghardt '60

Dear Jim,

That was a particularly interesting edition of The Andrean which arrived at our house today. The whole family has been enjoying it, and we think it is one of the best we have ever read.

The song reproduced on page 2 made me think of Jim Hamilton. We formed a Barbershop Quartet in my first year at S.A.C. — Fred Hiltz, Derek Inglis, Jim Hamilton and me. Jim had found the song in the Old Boys' office, and I arranged it for the Quartet. We actually performed it once, along with our more normal repertoire of 'Down By The Old Mill Stream' and 'Joshua Fit de Battle ob Jericho', and other things of that type.

What a wonderful man Jim Hamilton was. He was generous, kind, hospitable, courteous, full of humour, and with a terrific capacity for enjoyment. He spread his own sense of well-being among his friends. I always think of him as the ideal Andrean.

He and Betty did a lot to make our years at St. Andrew's such a particularly happy period in our lives. We feel lucky to have known him.

I enclose a contribution to the James Hamilton Scholarship. It comes with affection and gratitude from the Dawson family, — Janet, Jennifer and Tony (S.A.C. 1966-1973).

With all good wishes, Yours sincerely, Tony Dawson.

Dear Jim,

Thank you for your letter of October 29th. It's good to see you writing a letter on the computer. I have had my computer for some time now. My boys, Ryan and Greg, visit me weekly and both feel very comfortable using it. I'm glad I spent the time to make the files on the computer. Now that I'm quadraplegic, the time that I spent is worth its weight in gold. I have a new wheelchair and it has a micro-computer which allows me to tilt, recline and drive all by using my chin.

I have been following the progress made by S.A.C. with much interest. The computer world changes so fast it's hard to keep up to it. When my boys are at the computer I watch them in awe, and it makes me feel better knowing that S.A.C.'s high standards of education are keeping abreast.

The paint job probably gives the residences a whole new look. It sounds like it would be a lot cheerier. It must have taken gallons upon gallons of paint to cover that dismal brown.

Please pass along my best wishes to members of my class you may encounter.

Sincerely,
Iain MacKinnon '75

Dear Mr. Herder,

As we discussed a few weeks ago, I am interested in establishing an endowed scholarship in honour of Colonel Fred Tilston, V.C. I am aware that St. Andrew's might be, as every other institution is, feeling the pinch these days. If my contribution could be better spent on everyday expenses, I understand. For many years Col. Tilston has recognized fellow Andreans for "setting the best example for effort, persistency and tenacity in all school activities". I feel that we, the recipients of the Award, deserve to acknowledge Col. Tilston for all of his own achievements.

Find enclosed a letter that I received from the Canadian War Museum in July of 1987, which I felt might be of interest to St. Andrew's. Also enclosed you will find my contribution. I challenge all past recipients of the Tilston Award to contribute. I will be happy to help in whatever way I can.

Good health and good words to all.

Sincerely,
Ian Howey '87.

Dear Jim,

It gave me a great feeling of satisfaction to read your letter of November 22nd and the gracious remarks of Ian Howey.

It is rewarding to me that an Award winner acknowledges, in so tangible a way, his appreciation by donating to the S.A.C. endowment as well as encouraging others to do the same.

Please assure Ian that when the times arrives to award a scholarship, I would be pleased and agreeable that it is in my name.

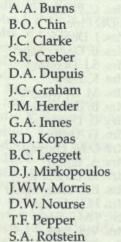

I look forward to my next trip to Aurora to see my friends and I'll be sure to drop in to S.A.C. for a chat. With my best wishes.

Sincerely, Fred Tilston.

1991-92 Parents' Annual Giving

The second year of The S.A.C. Fund proved to be as well received as the first with donations to special projects totalling \$192,000, down slightly from the previous year figure of \$206,000.

On behalf of David Dunlap, a Governor, Old Boy and Parent, may we express sincere thanks to all parents who participated during 1991-92.

Investment in the computer network project accounted for most of the funds raised by the S.A.C. Fund, but residence improvements and enhancements to other buildings also were special projects undertaken.

The S.A.C. Fund will continue to fund improvements to School facilities and educational equipment for the students in the year ahead. Thank you all for your participation.

The Red And White Ball Elvis lives . . .

A SERGAL

Ladies' Guild President Sandi Keto was all smiles with the results of the evening. Over \$40,000 was raised to benefit students through scholarships, bursaries and other programs.

The Headmaster joined the fun with a hockey sweater from his old second team.

The Ladies' Guild and the S.A.C. Association had a 'Ball' at St. Andrew's in April! The theme of the event was sports oriented and dress was casual — very casual — which was a hit with those attending.

The Band was fantastic! Roy Orbison, Elvis Presley and other greats from the 50's and 60's were dressed up as the famous band The Martels, and the Great Hall was rockin'. Mike Hillick and his staff put on a feast 'fit for a King' and the frosting on the cake was a MacPherson Tournament Puck.

The big 'winner' was the scholarship and bursary program. The net profit for the evening was \$41,000. Part of the proceeds was used to open the Ladies' Guild Endowment Fund to assist future Andreans.

Incoming 1992-93 Guild President Kirsteen Etherington has announced that next April's dance will be an 'Instant Replay'; casual, sports theme, sports auction and The Martels will return! See you there!

Mike Hillick and the Great Hall staff outdid themselves - as usual. This chocolate cake was a big hit in keeping with sports theme and auction.

Elvis was a big hit as The Martels played the hits of the 1950's and 1960's. Roy Orbison made an appearance too!

Red and White was start

Red and White was the theme and casual was the order of the evening. Look for next years's 'Instant Replay' to be just as much fun!

Three ladies who played a big role in the success of the 'Ball' were (l-r) Mary Ellen Chisholm, Lynn Pady and Linda McNally.

The 1992 Class Bursary

presented to St. Andrew's College by the Graduating Class of 1992

The Class of 1992, some sporting their Old Boy ties, surround the cake made in the shape of the Chapel.

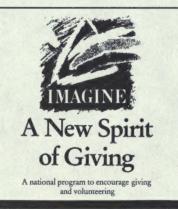

1991-92 Annual Giving

BEQUESTS

St. Andrew's gratefully acknowledges gifts of bequests planned by Old Boys and friends of the School. The growth of the endowment fund of the Foundation is enhanced annually by bequests and life insurance gifts. The endowment fund provides scholarship and bursary assistance for qualifying students. The College is honoured to announce the receipt of bequests from the estates of:

Bruce B. King S.A.C. 1911-22

MATCHING GIFTS

St. Andrew's College would like to thank Corporations which, through an employee Matching Gift Program, support independent education.

Canadian Tire Corporation, Limited Sir Joseph Flavelle Foundation The First Boston Foundation Trust The Manufacturers Life Insurance Company Marsh & McLennan Companies Inc. Metropolitan Life Insurance Company

Morgan Guaranty Trust Company of New York Pfizer Canada Inc.

The Noranda Foundation

The Prudential Insurance Company of America Joseph E. Seagram & Sons, Limited

Tambrands Inc.

The S.A.C. Foundation issues income tax receipts for gifts of a material nature. Works of art are the most common example of a gift-in-kind. However, office furniture and fire resistant file cabinets are urgently required for our Archives' new home and could qualify for a tax receipt.

Please call Jim Herder at 841-8999 to discuss a donation.

The Sports Complex Swimming Pool Tiles Update

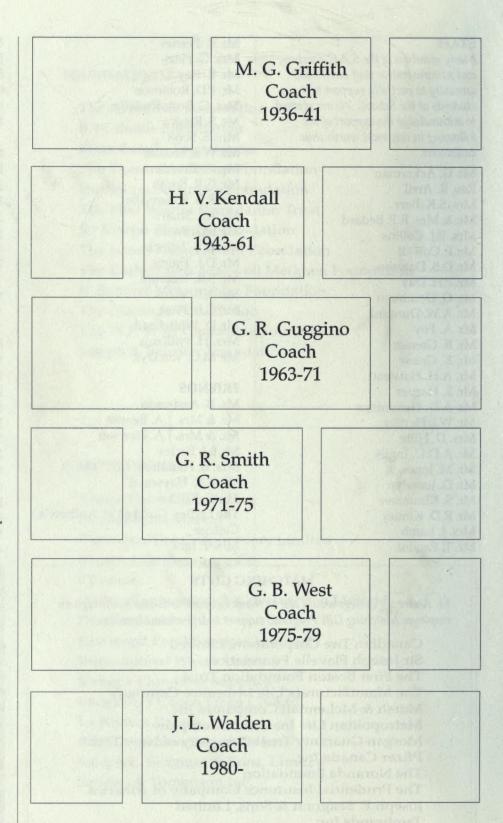

The capital campaign of 1988-91 raised funds to build the new sports complex at St. Andrew's. During the course of that campaign tiles were sold in the new pool (a tile is actually an anodized aluminum plate) engraved with the donor's name and years at the School.

Due to numerous requests it has been decided to continue the program for Old Boys who would like to purchase a tile (\$1,000) and add their name to what has become an historic landmark on the campus.

We have also been asked by a number of alumni to add the names of swim team coaches to a special area designated for that purpose.

If you would like to contribute toward a tile for one of the gentlemen listed, or others, please send your cheque or phone 841-8999 with your Visa or MasterCard number and you will receive a fully tax-deductible receipt.

W.J. Herder

B.C. Sports Hall of Fame F. N. Rowell '34

Frederick N.A. Rowell '34

Fred Rowell's dedication to Canadian track and field spanning four decades has led to his induction in the B.C. Sports Hall of Fame. The Agassiz resident was one of six sports personalities who were inducted this spring at the Hall of Fame's new facility at B.C. Place.

An avid athlete, active in track and field events, as well as football, swimming and skiing, he moved to Vancouver in 1947.

While working full-time at his Vancouver law career, Fred was U.B.C.'s assistant track coach. In 1948, he was responsible for the concept of Standards for Canadian International Team selection.

Fred initiated the Vancouver Relays, where he performed as Meet Director for many years.

In 1953, he was instrumental in setting up the first accredited national coaching school in Canada, through the Department of Physical Education at U.B.C.

One of his outstanding contributions was to the Amateur Athletic Association of Canada.

Prior to moving to B.C., Fred served as the President of the very competitive Central Ontario Branch, a role he would play in B.C. from 1955 to 1957.

In the decade between 1947 and 1957. Fred acted as chairman for several A.A.U. committees including Track and Field, Public Relations, and the 1955 Pan Am Games. He was also National Track and Field Chairman from 1953 to 1956 and was very active at the international level. During the 1948 London Olympics, he was manager of the Canadian Track and Field team. Over the years, his involvement with the Olympic Games included the Directorship of the Canadian Olympic Association from 1946 to 1950. Chairman of the Sub-Committee for Standards for the 1952 Olympics, and Track and Field Representative to the Canadian Olympic Association from 1953 to 1956.

Rowell was also active with both Vancouver's 1954 British Empire Games, and the 1955 and 1959 Pan Am Games, acting in administrative capacities ranging from chairman of the 1954 B.E.G. Track and Field Sub-Committee to Canada's general manager for the 1955 Pan Ams.

Fred may be best remembered for his role as founder of the Vancouver Olympic Club, established in 1949 to provide training and generate competition for B.C. athletes, as well as to raise funds to send them to international events. It is one of the most successful track clubs in North America.

In 1985, he competed at the World Masters Games in Toronto in high jump, hammer throw, shot put and discus event.

Fred served the School as a prefect in his graduating year 1933-34 and was fully involved in academic and athletic life. Upon graduation he presented the School with The Rowell Cup for annual track competition for races run at the middle distance (the mile, the half-mile and the quarter-mile).

The Andrean congratulates Fred Rowell on being named to the B.C. Sports Hall of Fame.

Huntsville Sports Hall of Fame G.C. Middleton '47

Gord Middleton '47 is honoured by his induction into the Huntsville Sports Hall of Fame. Above, he proudly wears the Hall of Fame medal.

In May 1992, Gord Middleton was inducted into the Huntsville Sports Hall of Fame in the "All Around Athlete" category. Born in Huntsville, Ontario, in 1926, Gord served notice at a relatively young age that he was destined to become an outstanding athlete.

In 1939, he won the Juvenile Division at the Ontario Skiing Championships placing first in downhill, slalom and cross country. In 1940, he followed this achievement with firsts in downhill and cross country in the Canadian Interscholastic Championships.

When the snow melted in spring, Gord would turn his attention to track and field. In 1940, he was junior medal champion of Huntsville & Districts High Schools. In 1943, he had his finest year ever winning provincial gold medals in the 100 yard dash, 220 yard dash, shot put and long jump.

In the fall of 1943, Gord entered St. Andrew's College with his brother Harold '47.

At St. Andrew's Gord began to play team sports, excelling at the halfback position for four years on the first football team. In 1945, St. Andrew's won the Little Big Four football championship and Gord was selected an L.B.F. all star.

While at S.A.C., he also played first cricket, second hockey and was a member of the rifle and ski teams. In 1946, he won first place in the downhill and slalom competitions at the L.B.F. ski meet hosted by T.C.S. He became senior track and field champion in 1946. In the course of winning this championship, Middleton ran the 100 yard dash in the record time of 10.1 seconds.

Following graduation from St. Andrew's in 1947, Gord played senior football for one year with the Peterborough Orphans of the Ontario Football League. He was again named an all star.

From 1948 until 1959, Gord was a valuable member of Huntsville's intermediate hockey team, the last four years as sponsor.

Middleton played senior baseball for Huntsville from 1947 to 1964. He both pitched and played the infield for the Huntsville Inter-County Champions of 1959 through 1964.

While he played for only three years, 1948-1950, Gord starred at lacrosse with the Huntsville Hawks of the Ontario intermediate league. He was forced to miss the 1948 lacrosse playoffs owing to his participation in the O.F.L. playoffs with the Peterborough Orphans.

When he turned his interest to curling in 1952, Gord was very active at a highly competitive level until 1985. He represented Huntsville as skip in various Ontario playdowns. His name appears on most of the trophies of that era which are on display at the Huntsville Curling Club. In 1974, he scored a rare 'Eight Ender' in a certified bonspiel for which he received award medals from the Ontario Curling Association, Crown Life Insurance and the Cosby

Company. The Huntsville Invitational trophy for seniors from North Bay to Barrie has been won only once by Huntsville. The skip of this winning rink in 1983 was Gord Middleton.

While not a 'circuit' golfer, Gord has won three trophies for handicap play at Huntsville Downs for the years 1970, '75 and '83.

From 1959 until 1980, Gord was Executive Officer for the Muskoka Board of Trade. A member of the Huntsville Chamber of Commerce, he was president from 1966-68.

A highly respected businessman, Gord was owner and operator of Middleton's Transport from 1959 until his retirement from trucking in 1976. He then turned to the mortgage and loan business and continues to be active in this field.

During the summer months, Gord resides in Huntsville with his wife Joan. A family man, he has three children, five grandchildren and one great grandchild.

Some years ago the Middletons purchased a 'casa' on the ocean front at Manzanillo, Mexico, where they comfortably spend the winter months.

Gord enjoys golfing and deep sea fishing while in Mexico. His summer months are spent in travel, golf and fishing. For many years he was Captain of the Hunt for the D.S.M. Hunt Club which was founded in 1947 by six St. Andrew's Old Boys. On three occasions when S.A.C. expansion week was held during the winter, the D.S.M. camp served as emergency base for the S.A.C. "Brass Monkey" survival group. Gord was always on hand to lend assistance.

Here indeed is an Andrean of whom we all can be proud.

W.P. Skinner '47

The Association Annual Dinner Music at St. Andrew's

The Music of St. Andrew's College was the attraction at the Association Annual Dinner held May 14th at the Royal York Hotel Ballroom in Toronto.

Featured during the dinner were performances from students

representing every aspect of the musical life of the School. The lineup included the awardwinning Treble Choir, conducted by Mr. Stephen Harper and accompanied by Mr. Andrew Brown; violinists Stephen Ward, Matthew Ward and Stephen Small, trumpeters Michael Boyer and Ramon Cameron, all accompanied by Mr. John Clements. During dinner, digestion was aided by the piano stylings of Hilton Leung and the unique sound of Tim Morrissey's Gaelic harp.

The grand finale featured a stirring bagpipe recital by noted piper *Graydon Cragg '87*, whose playing completed the evening's festivities. Several hotel guests remarked how "impressed" they were with the rendition of

Amazing Grace heard coming from the ballroom at the end of the evening. The old but ever-popular hymn provided a spirited end to a memorable evening.

S.A. Harper

Younger Old Boys were out in force for the dinner/reunion. (l-r) Matthew Stewart '87, Warren Wilkes '88, Tim Callaghan '87, Jeff Laceby '88, Wallace Watson '88, Bob Wilkes '87, Glen Oliver '87, Simon Murfitt '87, and Steven De Piero '88.

Piper Graydon Cragg '87 provided a stirring bagpipe recital at the Association dinner.

'Music at St. Andrew's' was the theme of this year's annual dinner held at the Royal York. Choir Director Stephen Harper also participates in Association activities by serving on the Editorial Committee of The Andrean.

The Association Annual Dinner Music at St. Andrew's

Bob Perry '68, Dinner Chairman, chats with Tim Macdonald '67

Fathers of Old Boys and current students are welcome to attend the annual dinner! (l-r) John Bona and Gilbert Howey join 1987 classmate sons Conrad Bona and Ian Howey at the dinner in May 1992.

Ramon Cameron (left) and Michael Boyer entertained at the Association Dinner

DEATHS

'12 D. Brainerd Carlyle died peacefully at Sunnybrook Medical Centre in North York, Ontario, in his 97th year, on January 22, 1992.

> He was born in his home in Toronto and attended the Model School before attending St. Andrew's from 1908 to 1912. Brainerd then studied medicine at the University of Toronto. He joined the COTC while at university and received his commission, which he credited to his Cadet Corps training at St. Andrew's. His education was interrupted by World War I and he proceeded overseas in 1915 with the 95th Battalion. He served at the front including Vimy Ridge with the 4th Battalion.

> He was first married to Ruth Bull in Oshawa in 1920 and they had one daughter and triplet sons. His second marriage was to Molly Ham Phillips in 1949.

> Brainerd worked in the piano business with Williams Piano Co. in Oshawa in the 1920s, and served as President of the Canadian Piano Manufacturers' Association and the Canadian Bureau for the Advancement of Music. He then joined North American Life Assurance Co. working in Winnipeg and Toronto until his retirement in 1980. He was President of the

Ontario Curling Association 1963-64, as was his father David Carlyle, 1908-09.

He is survived by his sons, Bill, David and Alan, all living in B.C., daughter Mrs. Isobelle Ruth Guthrie, of Beaconsfield, P.Q., ten grandchildren and seventeen great grandchildren.

'23 Gilbert de Beauregard
Robinson died on April 8,
1992, in Toronto, Ontario, at
the age of 85. Gilbert was
the son of Percy J.
Robinson, one of St.
Andrew's original masters,
who taught Classics from
1899-1946.

Gilbert entered St.
Andrew's at age ten in 1916
and distinguished himself
academically. Each year he
was an honours student
and was the recipient of
general proficiency prizes.

In Lower VI, he was awarded the Lieutenant-Governor's Silver Medal and the Lawrence Crowe Cup for shooting. In Upper

VI, he was the top student winning the Governor General's Medal, the Headmaster's Medal, the Wyld Prize in Latin and the Christie Cup.

Gilbert graduated in 1927 from the University of Toronto in Mathematics and Physics. Each year he came first in both subjects and won several scholarships and prizes. He studied for his doctorate at Cambridge, graduating with his Ph.D. in Mathematics in 1930.

Gilbert spent his career teaching at the University of Toronto and wrote several books and over 40 papers on mathematical theory.

He was made a Fellow, Royal Society of Canada, in 1944, and awarded the Member of the British Empire (M.B.E.) in 1946.

Gilbert was predeceased by his wife Joan Howard and is survived by his son *John* '64, daughter-in-law Bernadette, daughter Nancy Hill and four grandchildren.

'28 John ('Jack') Benjamin
Shortly died suddenly on
March 28, 1992, in Toronto,
Ontario, at the age of 82.
Jack attended S.A.C. from
1920 to 1928, making the
transition from Rosedale to
Aurora.

Following St. Andrew's,

Jack went to the University of Toronto where he obtained his B.A. and continued his interest in sports. He was Captain of the Varsity Tennis Team.

He spent his working life as an agent for the Excelsior Life Insurance Company, retiring when he was 70. Following his retirement he took up golf and was a member of the York Downs Golf club. Jack enjoyed winters in Florida and summers in Muskoka.

Jack was predeceased by his wife Alfreda Lavelle and is survived by his sons Robert and Michael and four grandchildren.

'31 A. Gerald Chubb passed away in Kingston, Ontario, on July 2, 1992.

> Following graduation from the Royal Military College he joined Lord Strathcona's Horse (Royal Canadian) in 1936.

Serving overseas with 1
Canadian Armoured and
HQ 5 Armoured Division,
Gerald attended Staff
College at Comberley with
the rank of Major and
ended WWII as Brigade
Major of 4 Armoured
Brigade and Commanding
Officer of The British
Columbia Regiment with
the Canadian Occupation
Force.

Retired in 1967, General Chubb was distinguished as

Director of Armour, Commander Joint Staff, United Kingdom; National Defence College Director and Senior Military Attache in Vietnam.

Gerald's wife Jean predeceased him and he leaves to mourn two sons, Peter and Stuart, both of Toronto.

'42 Alfred M. Hurter died on March 30, 1992, at his home in Ottawa after suffering from Lou Gehrig's disease. While at St. Andrew's, Fred was the co-editor of the Christmas 1940 and Mid-Summer 1941 editions of The Review. He had articles and poetry published in every issue. In his last year, he devoted his time to writing and producing Censored, a science fiction magazine published at St. Andrew's and widely read on and off campus. Fred's son Robert '70 wrote us, "Dad was very proud of his association with S.A.C. He had polio as a teenager and appreciated the great efforts made by S.A.C. to accommodate him. A special room on the first

floor of Flavelle House was prepared for him as he had a full back brace and braces on his legs and crutches ... He was not pitied, rather encouraged to exercise and, when he left S.A.C., the braces were gone."

After graduating from St. Andrew's in 1942, Fred went to McGill University, graduating with a B.A.Sc. in Chemical Engineering.

He was Chairman of HurterConsult in Ottawa and one of the world's leading experts in the field of pulp and paper production, particularly from nonwood fibres such as sugarcane bagasse, straw, reeds and grasses, bamboo and agricultural residues. He was the author or coauthor of over 20 technical papers and held half a dozen Canadian patents.

Fred's interests were varied, including pre-history, history, archaeology, paleontology, evolution, astronomy, cosmology, philosophy and quantum physics. He was a science fiction fan and had an avid interest in antique weapons, clocks and watches, castles, Persian and Oriental carpets and precious gems—he collected all but castles.

Fred leaves his wife Agnes, sons Timothy, *Robert W.* 70, daughters Hedy Anne and Maxine and six grandchildren.

'42 F.F. Gerald Tisdall died December 21, 1991, in Toronto, Ontario. Gerald attended St. Andrew's for six years.

He enrolled in pre-med at Queen's University but health problems prevented him from completing university. His business career was spent in marketing and sales and for many years he headed his own marketing firm, Broadcast Services, in Toronto.

Gerald's brother *Charles '38* wrote, "During his 40-plus years in Alcoholics Anonymous, Gerald was a very positive influence on hundreds of people who shared dependency problems with him. He was much in demand across North America as a speaker".

Gerald is survived by his wife Ruth Nutson, daughters Janet, Marilyn, Margery and Nancy, son Frederick and six grandchildren.

'43 W. MacDonald ('Mac') Lang died suddenly of a heart attack on February 27, 1991, at his home in Sundridge, Ontario.

While at St. Andrew's, Mac played First Hockey for two years. His interest in hockey continued as a player on championship O.M.H.A. teams and as a sponsor of many minor hockey teams in the Sundridge area.

He served his country as a radar operator on the Corvette H.M.C.S. Dundas during the Second World War.

Mac established a successful new car dealership in Sundridge from which he retired in 1979.

He is survived by his wife loyce and son Bill.

'44 Peter M. Dickie died June 10, 1992, in Toronto, Ontario. Peter attended St. Andrew's from 1939-40 for grade 9.

During World War II, Peter served with the 48th Highlanders of Canada in Italy. After his discharge he worked in the purchasing department of Amalgamated Electric Corporation for ten years. He then moved to the residential real estate field in Toronto and Muskoka and in 1973 was appointed Vice-President of Martin & Meredith Limited.

Peter was predeceased by his wife Cynthia Heighington and brother David '37. He is survived by daughters Heather Birchall, Mary, Jill and Robin Dickie.

'45 John (Jack) William
Kennedy Q.C., died
December 14, 1991, in
Vancouver, B.C., shortly
after being diagnosed with
lung cancer.

Jack attended St. Andrew's

from 1940-45. While at S.A.C., he played First Rugby, Hockey and Football and won the crosscountry run in 1942-43. Jack was a prefect, pipe

major in the Cadet Corps and President of the Athletic Association.

His wife Maryalice writes, "Jack's years at St.
Andrew's were among his most happy and he always took a keen interest in what was happening there. He valued highly the fine education the School provided and the lifelong friendships he made while at the School."

lack went west to Alberta in 1946 and following graduation from the University of Alberta Law School settled in Edmonton and became involved in the life of the community. He served on the Board of Governors of the University of Alberta, was President of the Edmonton Symphony Society and Chairman of the Advisory Committee for Northern Alberta of the Salvation Army.

Jack practised law in Edmonton from 1952 until 1985 when he was appointed by the Province of Alberta as its Agent General for China and South East Asia in Central Hong Kong.

He was appointed Queen's Counsel in 1968 and was an active member of the Law Society of Alberta and the Canadian and International Bar Associations. In 1988 he was elected an Honorary Life Member of the International Bar Association.

He is survived by his wife Maryalice, son William and daughters Sandra, Mary Lee and Elizabeth and six grandchildren.

'50 Thomas Todd died on March 2, 1992, in North Bay, Ontario.

During his four years at St. Andrew's Tom was a chapel boy, a member of *The Review* staff, played hockey and was a member of the First Football and swim teams. Throughout his life he remained an avid skier.

'57 George Gibson Ellsworth
died on June 29, 1992, while
visiting Adelaide,
Australia.

George attended St. Andrew's from 1951-57 and was a prefect who played First Football, First Hockey, was a member of the Debating Society and Librarian. Following St. Andrew's, George attended Princeton University and graduated with his degree in Geology.

At the time of his death, George was co-op coordinator of the Geology program at the University of Waterloo in its cooperative education and career services department.

George's father was S.A.C. Old Boy *Eric Ellsworth '29*. He is survived by his wife Kathleen, her children Peter and Susan Whitney and his mother Grace Ellsworth.

'65 Victor David Knox died suddenly on March 29, 1992, in Toronto of a heart attack while playing recreational hockey. He leaves his wife Christine and a son Victor Richmond William who was born on May 18, 1992.

Vic was an outstanding athlete at St. Andrew's and

is remembered for his leadership in the backfield of the 1962 Football

championship team. He also was a top swimmer and cricketer at S.A.C. Vic graduated from the University of Tennessee with a Bachelor of Business Administration degree and after an unsuccessful foray into professional football turned his attention to business.

He worked first with Uniroyal, then as Director of Marketing for Levi Straus of Canada, then Director of Marketing for McDonald's Restaurants of Canada and Vickers and Benson Limited.

张 张 张

EX-STAFF

Henry T. Holden passed away on July 14th at Sunnybrook Health Science Centre in Toronto, in his 84th year, following a long illness. He taught at St. Andrew's for nineteen years from 1945-64.

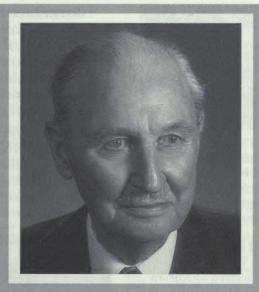

While he taught Latin, French, English and Geometry at St. Andrew's, it was for his teaching of senior History that he is best remembered. Henry served as Housemaster of Memorial House from 1956-59 when the boarders were arranged by grade and Memorial was the home of grade 12 and 13 students. He coached

football, hockey and cricket during his years, instructed public speaking and debating and produced excellent senior plays.

Many copies of the School yearbook, The Review, which now make up a large part of our archival records. have 'H.T. Holden' written firmly on the front cover. Henry served as staff advisor to The Review for years and was Corresponding Secretary for the Old Boys' Association before the Association had permanent staff. His contribution to the historical records of St. Andrews' Old Boys, from the end of the War until Jim Hamilton joined the staff in 1965, was significant.

Henry leaves his daughter Shelagh Willard, son Michael '62, six grandchildren, three brothers and two sisters. A memorial service was held in the School Chapel on Monday, July 20th, 1992.

Maxwell Meighen

Colonel Maxwell C.G. Meighen passed away on February 25, 1992, in Toronto. Born in Portage La Prairie on June 5, 1908, the son of the late Rt. Hon. and Mrs. Arthur Meighen, he was predeceased by his beloved wife, Catherine Jane McWhinnie and brother T.R. Meighen, Q.C. He is survived by his sister, Lillian Meighen Wright and several nieces and nephews.

He was educated at Lisgar Collegiate in Ottawa, Royal Military College in Kingston and the University of Toronto. He served in various capacities with the Allied Forces overseas from 1939 to 1945, attaining the rank of D.D.M.E. (Colonel) 2nd Canadian Corps and was awarded the O.B.E. and the Order de Leopold avec Palm and Croix de Guerre.

From the Army, he began his business career with the two Trusts founded by his father, Canadian General Investments Limited and Third Canadian General Investment Trust Limited and served as a Director and Officer for many years. At the time of his death he was Honorary Chairman of both Trusts.

During his business career, he held Chairmanships and Directorships of many Canadian corporations including Algoma Steel, Argus Corporation, Domtar, Hollinger, and Massey Ferguson. He served his community as a member of the Grace Hospital Board and as a member of the Salvation Army's Metro Toronto Advisory Board and was its Chairman from 1974 until 1979. He also acted as the 1955 Campaign Chairman for the Stratford Festival Theatre and was a member of the Board of Governors. He was a generous supporter of arts and educational interests, including St. Andrew's College, through the Catherine and Maxwell Meighen Foundation.

'18 Douglas Wood visited the School to watch the Headmaster's Parade - a dress rehearsal for the annual inspection. Douglas Worling '50 (left), the School archivist, took Douglas and his grandson, Derek Archibald '86 on a tour.

'27 George Young attended St.
Andrew's in Toronto from
1920-26 and moved to Aurora
with the School for his
graduating year 1926-27. In
April, George and his eldest
son, Peter, visited the School
for the first time since he
graduated!

George outlined to *The Andrean* that he had enjoyed three quite distinct business careers. Following the University of Toronto, from which he graduated with a B.A. in the Class of 1930, he joined McColl Frontenac, the forerunner of Texaco Canada.

In 1942, the family firm asked him to join because of a severe shortage of personnel during the war. George stayed with Gordon Young Limited for fifteen years until 1957 when he joined Dominion Securities.

George recalls he spent thirty very happy years at Dominion Securities retiring in 1987 at the age of 77! He was pleased to meet *Garrett Taylor '92* - grandson of *Ham Thorburn* who was a contemporary at St. Andrew's.

George gave the School a photograph of the 1927 graduates and identified them all. This is a most important piece of the history of the School which is now entrusted to the School archives.

'31 Penman Smith is president of the Golden Horseshoe Chapter of the Canadian Condominium Institute. He also serves as clerk of session at Aldershot Presbyterian Church.

(photo: David McCart)
The late Jim Hamilton was honoured by
the Canadian Association of Independent
Schools' Development Officers in March
of 1992. In the photograph above, his wife
Betty and daughters Jocelyn Manchee
(left) and Cynthia Torokvei proudly
display the citation.

Jim was one of four development pioneers in Canada who were honoured for their service and devotion to their schools and to Independent Schools across the country.

'38 J. Fyfe Macdonald, after thirtyeight years of active medical practice in Simcoe, Ontario, and Montreal, Quebec, has moved to Lindsay, Ontario, where he is on staff at Ross Memorial Hospital.

> Charles Tisdall wrote the text for a booklet published by St. Paul's Anglican Church on the history of the Parish, which this year is celebrating its

150th anniversary. St. Paul's, Bloor Street, Toronto, kindly hosts the St. Andrew's Carol Service in December and the Cadet Corps Church Parade in May each year.

Doug Gear '40 has a collection of S.A.C. memorabilia which includes photos of his father G.H. Gear '19 and son Jim '69

- '40 Douglas Gear has been retired from his medical practice for five years. For the past three summers he has enjoyed working as a physician on Baffin Island.
- '46 Harry Irving has recently been awarded a directorship on the Board of Munich Canada Management Corporation, a holding company based in Toronto dealing with the operations of Munich Reinsurance of Canada. Harry lives and works in Calgary.

Sandy Milligan retired from Royal Trust after thirty years in Human Resources and Premises and is now a consultant with Peat Marwick Stevenson and Kellogg in career transition services. Sandy lives in Oakville, Ontario.

"The Friends of St. Michael's", the fundraising arm of the Hospital with a target of \$67 million.

- '51 Warren Ritchie wrote he enjoyed the last Andrean and news of old friends from many years ago ... time goes by quickly. Warren is semiretired; he does some accounting for International Platinum, is a part-time controller for a local manufacturing company and audits for a small C.A. firm. Warren and his wife Glenna spend a lot of time at their chalet in Ellicottville, N.Y. Warren saw Dave Gallagher and Fraser Hale at Holimont and "both were in good form".
- '52 Sandy Cantley wrote us "great to get The Andrean and keep up with School news". Sandy is retired and spends three months each winter in Sarasota, Florida. Spring and summer are spent at the cottage at Rustico, N.S., which looks over the Northumberland Strait across at P.E.I. Sandy and his wife Barbara enjoy golf and tennis.

A.G. (Tony) Ellershaw '52 sends his best wishes to all of his Andrean friends

'53 Arleigh Omstead retired last year from Omstead Refrigerated Transportation Ltd.

Iohn Trent, who is Associate Professor and Chair, Department of Political Science at the University of Ottawa, organized and chaired the first Pan Canadian Constitutional Conference in November, 1991, the format of which was copied by the Federal Government. John is the President of Dialogue Canada, an association to promote mutual understanding among Canadians. Persons interested may contact him at Dept. of Political Science, University of Ottawa, Ottawa, K1N 6N5, (613)564-5818.

Walter Somerville has transferred from Vancouver to Toronto with Scotia MacLeod.

- '54 Willie Frith was recently awarded the French
 Government's highest honour, the Order of the Legion of Honour, rank Chevalier, by the Consul General of France in New York, on behalf of President Francois Miterrand. Willie has served France as Honorary Consul in Bermuda since 1961.
- '56 Barry Black's daughter,
 Brenda Lee, married Sean
 Boyle on August 8th in
 Toronto. Sean's grandfather, S.
 Gordon Robertson, attended
 St. Andrew's from 1912 to
 1914, and was a Housemaster
 from 1923 to 1926. Sean very
 kindly donated his
 grandfather's memorabilia to
 the School Archives.

Reilley Tapley operates the Logging Chain Lodge in

Dwight, Ontario. He has a two year old grandson Travis.

George Tejada retired last spring from Falconbridge Dominicana where he was Assistant Manager of Operations.

'57 Peter Ketchum met and reminisced about old times with Jacobo Mizrahi '57 while visiting in Venezuela. Peter wrote also of his chance meeting with Peter McLean '51 while visiting Costa Rica. Both enjoyed sharing their past experiences and catching up on the present. Peter is in Italy with Whirlpool International.

J. G. Godsman

'58 James Godsman has been cited by Travel Agent magazine, a leading travel industry business publication, as the 1991 Cruise Industry Executive of the Year.

> Jim is President of Cruise Lines International

Association (CLIA), the marketing organization for the cruise industry in North America, with headquarters in New York. The association represents virtually all the cruise lines operating out of the U.S. and some 20,000 travel agency affiliates in North America.

In its issue citing travel industry leaders, the publication praised his ability to accommodate the needs of a widely diverse group of cruise companies and his commitment to the travel agents of America.

Before joining CLIA in 1985, Jim held senior marketing positions at Emery Worldwide, American Airlines and Southern Airways. He began his career with consumer products companies, including the Maxwell House division of General Foods Corporation and the L'Eggs Products division of Hanes.

A graduate of Dartmouth College and the Wharton School of Finance and Commerce, he resides in New Canaan, Connecticut, with his wife Betsy and their two sons.

Where Tradition Plugs into the Future.

At the finest computer based learning environment in Canada.

In considering your son's future, consider St. Andrew's College. A remarkable computer network has been completed at the school, linking student residences, the computer science laboratories, the library, the teachers' homes, in short the entire campus.

St. Andrew's has nearly a century of tradition in developing the complete individual, the all-round citizen, through the finest program of academic, athletic and extra-curricular activities available.

A committed faculty, excellent facilities, a richly rewarding learning environment, all make St. Andrew's College an investment of immeasurable value. Does your son's future deserve anything less?
